

PARENT PORTAL GUIDE

Schedules, studio info and important dates — on your phone, in one place. Here is how to get in and find your way around.

didc.app

BEFORE YOU START

The Parent Portal is the studio's home for class schedules, announcements and dates that matter. It lives at **didc.app** and works on any phone — nothing to download from an app store.

// ALL YOU NEED

- ✓ **Your phone** (or a tablet or computer — everything works there too).
- ✓ **The email address the studio has for you** — the one on your Enrollio account.

YOU MAKE AN ACCOUNT ONCE

The portal now has its own login, so what you see is **your** family — your dancers, your classes, your announcements. Making the account takes about three minutes and only happens once. It is separate from your Enrollio password, but it starts from the same email address. If the studio ever gave you a **studio code**, it is no longer used.

// THE 60-SECOND VERSION

- 1 Open **didc.app** and tap **Dancer Portal**.
- 2 Tap **Sign up** the first time — after that, **Log in**.
- 3 Your home screen opens with your dancers on it, and the studio's sections along the top.

The rest of this packet walks through each of those, screen by screen.

WHAT'S INSIDE

- | | | |
|----------|--|-------|
| 1 | Making your account | p. 3 |
| 2 | Your home screen | p. 4 |
| 3 | Put it on your phone | p. 5 |
| 4 | Finding your way around | p. 6 |
| 5 | The class schedule | p. 7 |
| 6 | Inside a class page | p. 8 |
| 7 | Studio info & announcements | p. 9 |
| 8 | The calendar & saving dates | p. 10 |
| 9 | Questions & fixes | p. 12 |

TWO PROGRAMS, ONE PORTAL

All-Star Dancers is the competition team side; **Academy / TNT Dancers** is the class side. Both work exactly the same way — this guide uses All-Stars in the pictures, but every step applies to both.

 **Nothing to install.** It's a website that behaves like an app — always the latest version, nothing to update.

 **Use it on any device.** The same login works on your phone, a tablet and a computer — sign in on as many as you like.

 **Always current.** Schedules and dates come straight from the studio — what you see is what the front desk sees.

1

FIRST TIME ONLY • ABOUT THREE MINUTES

MAKING YOUR ACCOUNT

Everything starts at **didc.app**. You need the email address the studio already has for you — the one on your **Enrollio** account.

- 1 Open your phone's browser and go to **didc.app**.

Safari on iPhone, Chrome on Android — either is fine.

- 2 Tap the pink **Dancer Portal** tile.

Staff Portal is for teachers and front-desk staff. If you end up there, go back and pick the other tile.

- 3 Tap **Sign up**.

Log in is the one you'll use every time after today — it needs an account to exist first.

- 4 Type your first name, last name and **your Enrollio email address**, then tap

Continue.

Any other address is not recognised, and no code is sent.

- 5 Choose a password and type it twice.

Six characters or more — let your phone save it.

- 6 Fetch the **6-digit code** from your email, type it in, and you're in.

After today it's just **Log in**.

Step 3 — two doors, one for each

Step 6 — the code from your email

NO CODE ARRIVED?

Look in **spam** or **junk** first — that is where it usually is, and it doesn't mean anything is broken. No rush: **the code works for a whole hour**. Still nothing? The address you typed is probably not the one we have on file — ask at the front desk.

2

EVERY VISIT AFTER THAT

YOUR HOME SCREEN

Log in and this is what opens: everything for **your** dancers on one page, with the studio's three sections along the top.

// WHAT'S ON IT

- 1 **The studio** — three buttons across the top.
Billing & Admin opens Enrollio in its own tab for payments and account details.
All-Star Dancers and **Academy / TNT Dancers** are the two program sections — schedules, announcements and the calendar. Those are pages 6 to 11.
- 2 **Up next** — the next class one of your dancers has.
 Day, time, room, teacher, and what to bring. The thing you open the app for on the way out of the house.
- 3 **Updates** — announcements that apply to your family.
 Studio-wide notices and anything posted to a class your dancer is actually in. Not the whole studio's news — just yours.
- 4 **Your dancers and At a glance** — who's enrolled, and the season so far.
 Classes this week, classes danced, hours in the studio.
- 5 **Your classes** — every class your dancers are in.
 Tap the arrow beside one to open its page. There are also buttons to put a class in your own phone calendar for the whole season.
- 6 **Attendance and Files & forms.**
 Attendance is a record per dancer; Files & forms is anything the studio has shared with your family to download.

TWO SECTIONS ARE FOLDED SHUT

Your classes and **Attendance** start closed so the page stays short. Tap the title to open either one — your phone remembers which way you left them.

Your home screen — after logging in

NOTHING HERE YET?

If the page shows the three studio buttons and nothing underneath, your account has not been matched to your family. Nine times out of ten that means the email you signed up with is not the one the studio has on file. Tell us at the front desk and we'll join them up — the programs, schedules and calendar all work in the meantime.

3

ONE-TIME SETUP • OPTIONAL BUT WORTH IT

PUT IT ON YOUR PHONE

Add DIDC to your home screen and it opens like a regular app — no address to type, and it still works when the signal is poor.

ON IPHONE

USING SAFARI

- 1 Open **didc.app** in **Safari**, then tap the **Share** button  — at the bottom of the screen on an iPhone, the top on an iPad.
- 2 Scroll down the list and tap **Add to Home Screen**.
- 3 Tap **Add** in the top right corner.

ON ANDROID

USING CHROME

- 1 Open **didc.app** in **Chrome**, then tap the **menu** button  at the top right.
- 2 Tap **Install app** — or **Add to Home screen** if you don't see it.
- 3 Tap **Install** to confirm.

Some Android phones skip the menu entirely — the front door shows a one-tap **Add DIDC to my home screen** button instead. Tap it, then tap **Install** when your phone asks.

When you're done, the **DIDC icon** appears on your home screen and opens like any other app. The in-app version of these steps lives on the front door — tap **Add this app to my phone** and it shows the right steps for whichever phone you're holding.

ON A COMPUTER?

Everything works in a normal browser tab too — just bookmark **didc.app**. If you'd like it as an app, look for the **install icon** at the right-hand end of the address bar and click **Install**.

THE RESULT

One tap from the home screen, straight to the studio.

No address to type, no app store, and it still opens when the signal at the studio is poor.

THE MAP

FINDING YOUR WAY AROUND

Every path through the portal, on one page. Four tabs along the bottom of your phone do most of the work.

didc.app — the front door

Tap **Dancer Portal** (Staff Portal is for teachers)

Log in — or Sign up, first time

Your email and password (see page 3)

Your home screen

Your dancers and their classes — plus the studio's three sections along the top, including **Billing & Admin** for payments (see box below)

Your program's Overview

Latest update, what's coming up, and the way into everything else

Overview

The front page of your program

Classes

Weekly schedule & each class's page

Info

Announcements from the studio

Calendar

Rehearsals, competitions, studio dates

LOST? TAP THE LOGO

The **DIDC logo** at the top of every page always takes you back to the front door. The **< back arrow** next to it steps back one screen.

PAYMENTS LIVE ELSEWHERE

Tuition, registration and account details are handled in **Enrollio**, the studio's billing system. The **Billing & Admin** button at the top of your home screen takes you straight there — it opens in its own tab.

The tab bar sits at the bottom of every screen on a phone. On a computer, the same places are tiles on the page itself.

THE CLASS SCHEDULE

The whole week, one day at a time — with search and filters when you only care about your dancer's classes.

- 1 **Pick a day** on the strip. The little number is how many classes run that day; a dot marks today. Tap **All** to see the whole week at once.
- 2 **Search** by class name — or use the small calendar button to open the **Season calendar** and jump to any date.
- 3 **Filter** with the funnel button: by program, time of day, style, age group, teacher or studio room.
The handiest one is **Dancer's age** — type their age and the list shows only classes they are old enough for. Tap **Show N classes** to apply, **Clear all** to start over.
- 4 **Tap any class** to open its page — schedule details, teacher notes and files live there (next page).

THE COLOR STRIPES

- Pink** — All-Stars (competition team)
- Blue** — Academy classes
- Amber** — TNT classes

ON A COMPUTER

The schedule gains a **List / Week / Month** switch and a full filter bar with sorting — same information, more room. Your view choice is remembered for next time.

WHY IS A CLASS MISSING?

The schedule shows what the studio has published for your program. If your dancer's class isn't listed, or a detail looks off, tell the front desk — they can fix it in minutes.

6

TAP ANY CLASS TO OPEN IT

INSIDE A CLASS PAGE

Every class has its own page: the details, notes from the teacher, and any photos, videos or music they've shared.

1 The class card — day and time, teacher, level and studio room, plus length, ages, style and season underneath.

2 Class info — notes posted for *this class only*: costume details, schedule tweaks, what to bring.

If it says "Nothing posted yet", the teacher simply hasn't posted — it fills in over the season.

3 Class content — the files.

Photos open full-size when tapped. Videos play right on the page. Music and paperwork download when tapped. The **Save** link under a photo or video puts a copy on your phone.

DATA-FRIENDLY

Videos only load a preview frame until you press play, so browsing the page won't eat your data plan. If a file shows "*Could not open — try again*", it's usually the signal — tap it once more.

Photos — tap to see full size. Use **Save** underneath to keep a copy on your phone.

Videos — press play and they run right on the page, sound and all.

Music & paperwork — tap once and the file downloads to your phone.

STUDIO INFO & ANNOUNCEMENTS

One feed for everything the studio and your teachers post – closures, deadlines, procedures and news.

- 1 Tap **Info** in the bottom tabs.

The little pink number on the Overview page's Info tile is how many announcements are posted.

- 2 **Pinned** means important – it stays at the top no matter how old it is. Everything else runs newest first.

- 3 Announcements come from two places: the **studio** (everyone sees these) and **your dancer's teachers** (class notes, which also appear on that class's own page).

MAKE IT A HABIT

The portal doesn't send notifications – it's a bulletin board, not a group chat. A quick glance at **Info** while you wait at drop-off or pick-up is the easiest way to never miss a closure, a costume deadline or a schedule change. The newest post is always right on your program's **Overview** page too.

READ-ONLY, ON PURPOSE

There's nothing to reply to and no comment box – if a post raises a question, ask the front desk or your teacher, exactly like you would about a paper notice.

8

CALENDAR TAB • PART ONE

THE CALENDAR

Rehearsals, competitions, showcases and closures — everything dated, in a month grid or a simple list.

- 1 Switch between **MONTH** and **LIST** at the top.
Month is the grid you see here. List is everything upcoming, in order, grouped by month — past events drop off by themselves. The app remembers which one you prefer.
- 2 Tap a **date** with a little bar under it — its events appear below the grid.
Today is outlined in pink; the day you tapped is filled in. Multi-day events, like a holiday closure, stretch across the grid as one long bar.
- 3 Tap the **event itself** for the full details — when, where, the full write-up, and any attached files.
- 4 Press **ADD** to save the date to your own phone's calendar — that's the next page.

WHERE THESE EVENTS COME FROM

The portal calendar is fed directly from the studio's own calendar, so it is always the latest word. If a date here disagrees with a paper handout, trust the portal.

BROWSING THE SEASON

The arrows step month by month — up to a year ahead, and one month back. Use **LIST** when you just want "what's next" without hunting through a grid.

The pink stretch Dec 21–26 is one multi-day event — winter break.

SAVING A DATE TO YOUR PHONE

Press **ADD** on any event and pick where it should go. Whichever you choose, the event arrives with the time, place and details already filled in.

The sheet slides up when you press **ADD** — one tap on a row does the rest.

// WHICH ONE SHOULD I PICK?

- ✓ **You use Gmail?** Pick **Google Calendar**. It opens with everything filled in — press **Save** there and you're done.
- ✓ **You use the iPhone calendar?** Pick **Apple Calendar** — your phone offers to add the event straight away.
- ✓ **Work calendar in Outlook?** Pick **Outlook** — same idea, press **Save** when it opens.
- ✓ **Anything else** — **Any other calendar** downloads a small calendar file; open it and your calendar app takes over.
- ✓ **Sharing with the other parent?** **Copy link** puts the date on your clipboard — paste it into the family group chat.

ONE THING TO REMEMBER

A saved date is a **copy**. If the studio later moves the event, the copy in your phone doesn't move with it — the portal calendar is always the source of truth. For anything critical, glance at the portal the day before.

THE LITTLE MESSAGES

After you tap, a small note at the bottom of the screen confirms what happened — *"Opening Google Calendar — press Save there to keep it."*, *"Calendar file saved — open it to add the date."* or *"Link copied."*

START TO FINISH — THE USUAL CASE

QUESTIONS & FIXES

"THE CODE NEVER ARRIVED."

Check **spam** and **junk** first — that is where it usually is. The code is good for a whole hour, so there's no rush. If it really isn't there, the address you signed up with probably isn't the one we have on file: ask at the front desk.

"I'VE FORGOTTEN MY PASSWORD."

On the login screen tap **Forgot your password?**, type your email and we'll send a reset link. Check spam for that one too.

"IT SAYS MY EMAIL ISN'T RECOGNISED."

Sign-up only accepts the address on your **Enrollio** account. If you've used a different one — a work address, a partner's — nothing will arrive and nothing will say so. The front desk can tell you which address we hold.

"WHERE DO I PAY TUITION OR UPDATE MY DETAILS?"

In **Enrollio**, the studio's billing system — tap **Billing & Admin** at the top of your home screen and it opens in its own tab. Your portal password is separate from your Enrollio one.

"DO I NEED TO UPDATE THE APP?"

Never — it's a website, so you have the latest version the moment you open it.

"A PAGE DIDN'T LOAD OR LOOKS STUCK."

Usually just the signal. Close the app and open it again — or reload the page in your browser. Everything picks up where you left off.

"A PHOTO OR FILE WON'T OPEN."

If you see *"Could not open — try again"*, tap it once more — large videos can take a moment on studio Wi-Fi.

"A DATE ON MY PHONE DOESN'T MATCH THE PORTAL."

Saved dates are copies and don't update themselves. Check the portal calendar, then press **ADD** again to save the corrected one.

"CAN I SEE THE OTHER PROGRAM TOO?"

Yes — both sections are on your home screen and your login opens either one. All-Stars is the competition team side, Academy / TNT is the class side.

"I'M LOGGED IN BUT I CAN'T SEE MY DANCERS."

Your account hasn't been matched to your family yet — usually because you signed up with a different address from the one we hold. Tell the front desk and we'll join them up. Payment details always stay in Enrollio.

KEEP THIS LINE SOMEWHERE HANDY

didc.app → **Dancer Portal** → **Log in**

Anything this guide doesn't answer — just ask us at the front desk. We'll get you sorted in a minute.
